HOW TO MEASURE

Measure points 1-6, placing a piece of masking tape on the pants at each point. Measure the distance between each piece of tape (points 7-14). On second leg, start at hip, place a piece of tape at points 1-6 using distance measurements 7-11, which you took on first leg. Measure the circumference of the leg at points 1-6 like you did on first leg. Write measurements in appropriate spaces on chart. Please take measurements over whatever apparel you will be riding in.
